Locks

Quest

Upper Park

The Propeller to the west of the Visitor's Center was powered by what size diesel engine?

What is the cylindrical object by the west observation platform?

The plaque on this object tells us Lake Superior is how much higher than Lake Huron?

What is located in the northwest corner of the upper park?

What does the plaque below the observation platform to the north of the Visitor's Center celebrate?

Where did the cut stone east of the Visitor's Center come from?

To your left is a piece of the Independence, the first steamship that ever sailed on Lake Superior. If it were not for this piece of metal, the ship would not move. What is it?

Down the sidewalk to your left is a drinking fountain. What animal tracks are located near it?

The Poe and _____ Locks are shown in the nearby lock model.

What building is located between the Poe and MacArthur Locks?

In the east lock model display what two locks are identical?

Between the Poe and MacArthur Lock there is a bird of prey always on watch. What is it?

Lower Park

Take the stairway to the north of the lock models. Look for the cut stone plaque at the bottom of the stairs and to the left. Who did the cut stone work?

When was the cut stone plaque put up?

What is located in the northeast corner of the lower park?

What colors are the lights in the fountain?

Take the southwest path from the fountain. What was Governor Chase S. Osborn's nickname?

Governor Chase S. Osborn was Governor of Michigan during what years?

Continue southwest. What item in the Soo Locks Park was brought from Japan as a gift from Governor Chase S. Osborn?

Main Gate Area

What were the two monuments located by the main gate entrance used for?

The Soo Locks are also known as?

When were the Soo Locks named a Registered National Historic Landmark?

Brochure

Which lock was constructed in 1919?

Which two locks are the longest?

Which lock is the widest?

Which lock is the deepest?
